Summary

Software Developer with **almost 4 years of experience** at **Amdocs Development Center India**, building scalable microservices for telecom billing and customer migration (**5M+ transactions/month**). Leading **USCC–T-Mobile** integration with **Java, Spring Boot, Apache Camel (Red Hat Fuse), Quarkus, REST/SOAP**, and **IBM API Connect** on **OpenShift/Kubernetes**. Strong in CI/CD (GitLab, Jenkins), observability (Prometheus/Grafana, Splunk/Kibana), and production cutover support.

Technical Skills

- **Languages:** Java, SQL, C++
- **Integration & Backend:** Apache Camel (Red Hat Fuse), Quarkus, Spring Boot, REST/SOAP, XML/JSON, Microservices, IBM API Connect, Enterprise Integration, SOA, Swagger, Maven
- **Messaging & Data:** Apache Kafka, PostgreSQL, MySQL, MongoDB, Couchbase, Hibernate
- **Cloud & DevOps:** Docker, Kubernetes, OpenShift, AWS, GitLab CI/CD, Jenkins, Linux
- **Monitoring & Tools:** Prometheus, Grafana, Splunk, Kibana, Postman, WireMock, Jira, Git

Experience

Amdocs Development Center India Jul 2024 – Present
Software Developer - Experienced Pune, India

- *USCC Integration (T-Mobile – USCellular Acquisition):* Designed and developed integration microservices using **Apache Camel (Red Hat Fuse)** and Quarkus on **OpenShift**, exposing **REST/SOAP** APIs via **IBM API Connect** for large-scale customer migration.
- Implemented and managed **GitLab CI/CD pipelines** for automated builds, integration tests, and OpenShift deployments; maintained technical documentation for integration flows and release sign-off.
- *XL Aziata Jakarta (Indonesian Telecom):* Led C1/D1 platform upgrade; built **Prometheus/Grafana** monitoring dashboards that cut mean incident detection from **45 min to under 5 min**.
- Designed XML/JSON contract transformations and integration patterns between Amdocs and external carrier systems, ensuring scalability and reliability across **3 cross-functional teams**.

Amdocs Development Center India Apr 2026 – May 2026
Software Developer - Onsite Guadalajara, Mexico

- *USCC to T-Mobile transition (onsite):* Led production deployment, cutover support, and post-go-live stabilization of Quarkus/Camel integration services during the acquisition migration.
- Provided L2/L3 production support: triaged live incidents, coordinated UAT sign-off, and partnered with client and carrier teams on integration testing and release readiness.

Amdocs Development Center India Jul 2022 – Jun 2024
Software Developer Pune, India

- *Turbo Charging (Telecom Billing Platform):* Developed and enhanced Spring Boot microservices integrated with PostgreSQL, Hibernate, and Kafka, handling **5M+ transactions/month** at **99.9% uptime**.
- Built asynchronous event-driven pipelines consuming Kafka topics for real-time billing, introducing new APIs per business requirements for catalog and subscription workflows.
- *Versionless (R & D):* Engineered a custom WireMock mapping framework that reduced API mock setup time by **60%**, and built Rest Assured component tests and Scala performance tests raising coverage to **90%**.
- Triaged **30+ critical production issues** (2 quarters), cutting incident volume by **60%**; automated GitLab CI/CD and Docker/Kubernetes releases from weekly manual deploys to **daily deployments**.

Education

National Institute of Technology, Warangal July 2019 – June 2022

Master of Computer Applications – CGPA: 7.89/10

Devi Ahilya Vishwavidyalaya, Indore June 2016 – July 2019

Bachelor of Computer Science – 69%

Projects

Distributed URL Shortener

[GitHub](#) 

Java 17, Spring Boot 3, Redis, Postgres, Docker

- Versioned REST API with **Redis INCR + Base62** IDs, **cache-aside** redirects, and Postgres persistence; optional custom aliases and TTL (1–365 days).
- **Async click analytics** on redirect; per-IP **Bucket4j** rate limiting; **OpenAPI/Swagger** docs; Docker Compose stack validated with **Testcontainers**.

Real-Time Notification Service

[GitHub](#) 

Java 17, Spring Boot 3, Kafka, WebSocket, Postgres

- Event-driven pipeline: REST publish returns **202 Accepted** to Kafka; **3 concurrent consumers** with manual offset commit and JSON events.
- Multi-channel dispatcher (**WebSocket, email, SMS**) with Postgres status, **retry/DLT**, OpenAPI, and Docker Compose (Kafka, Postgres); REST APIs for publish, history, and delivery status.

Expense Tracker REST API

[GitHub](#) 

Java 17, Spring Boot 3, Spring Security, JWT, Postgres

- JWT-secured expense CRUD with admin-wide and user-scoped access; paginated APIs with category, date, and amount filters.
- Jakarta Bean Validation, **@RestControllerAdvice** errors (400–409), **OpenAPI/Swagger** (Bearer JWT), **11 Testcontainers** tests, Docker Compose.

Certifications

- **Intro to AI Agents and Agentic AI** – Udemy
- **Generative AI for Beginners** – Udemy
- **Java (Intermediate) Certificate** – HackerRank
